

Presentations

Assessment form

Aspect 1

Presentation style

Evaluate the presentation style (rhetoric/structure of the presentation/...).

(Highest grade = 5 points)

Grade for Aspect 1

Choose...

Comment for Aspect 1

Aspect 2

Completeness

Does the presentation cover all the required tasks?

- Methodology,

- Results: Visualization of the optimal routes to *Basilika Mariatrost*, *Schlo.* **distance as costs**,
- Comparison of these routes.

(Highest grade = 15 points)

Grade for Aspect 2

Choose...

Comment for Aspect 2

Aspect 3

Visualization of results and interpretation

Visualization:

- Is the map labelled correctly with units?
- Are the graphs scaled properly?
- Are the routes clearly visible (linewidths, colour)?

Interpretation:

- Does the presenter compare the results of the different cost functions (t
- Are the differences between these results analysed and well-explained?

(Highest grade = 20 points)

Grade for Aspect 3

Comment for Aspect 3

Aspect 4

Own cost function (2.1) or comparison to A* algorithm (2.2)

If task 2.1 was chosen:

- Explanation of the self-developed cost function
- Arguments that self-developed cost function is the most efficient for the task
- Comparison of the results of the self-developed cost function to the results of the A* algorithm
- Interpretation of the results

If task 2.2 was chosen:

- Comparison of A* and Dijkstra: what are the advantages and disadvantages
- Visualization of the routes calculated by both algorithms
- Comparison and interpretation of the results

(Highest grade = 20 points)

Grade for Aspect 4
